Summary

Product Designer with practical experience designing user-centered digital products, including MVPs and internal platforms with complex structures and logic.
Skilled in working across full interface flows in Figma from layout and interaction to scalable design systems.
Collaborates closely with product managers and developers to solve product challenges through thoughtful UX, clear structure, and practical problem-solving.

Experience

Product Designer - Docker Container Management Platform
June 2025 – Present - Part Time

Leading UX/UI design for a web-based platform that enables developers to create, configure, and monitor Docker containers and servers.

- Redesigned key screens, including onboarding, container configuration, and server dashboards to improve usability and visual clarity.

- Identified and resolved UX issues in the early product flows; introduced new interface patterns tailored to developer needs.

- Built scalable UI components in Figma using the Atlassian design system, adapting and extending the system to fit product requirements.

- Collaborating closely with a project manager and development team to align features, user flows, and implementation.

Freelance Product Designer
2024 - 2025

Nonprofit Project Management Platform (MVP)

- Designed the MVP for a platform helping nonprofits manage strategy, internal goals, and impact workflows.

- Created a scalable, custom design system in Figma to unify styles and components across the product.

- Redesigned key flows, including onboarding, scope definition, and a visual strategy builder to simplify user decision-making.

- Collaborated closely with the founder and a developer to align UX with real-world nonprofit needs.

Catering Management System

- Designed an internal-facing interface for managing catering operations, including menu setup, delivery preferences, and customer data.

- Translated an existing flow into clean, modern UI screens using Figma, applying hierarchy and layout best practices.

- Worked directly with the founder to finalize requirements.

Jewelry Workshop Website

- Designed and developed a responsive 5-page website (desktop & mobile) using WordPress and Elementor.

- Created a simple visual language with consistent typography, color palette, and layout structure.

- Integrated Google Analytics and Google Search Console for performance and SEO tracking.

E-commerce Manager - Sofi Design - 2023

- Managed a Shopify-based online store, including product uploads, collections, updates, and processing customer orders.

- Ran email marketing campaigns.

Customer Support - Co Co Collective - 2023

- Handled customer support via WhatsApp, email, and Instagram.

- Managed order processing for a WordPress-based e-commerce site.

Self-Employed - Nispana Jewelry

2020-2023

- Built and managed an e-commerce website for an independent jewelry brand.
- Handled product listings, order processing, and customer communication.
- Managed supplier coordination and day-to-day business operations.

Education

- UX/UI Program (3 courses: UX/UI, UX, and Figma) – Netcraft Academy
- Social Media Marketing Course - Digitalent
